DETAILED ACTION

Allowable Subject Matter

1. Claims 8-14 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claim 8, the prior art alone or in combination does not teach the limitation a high resistive thin film resistor structure comprising: a patterned, lightly doped polysilicon layer located on and in contact with the isolation region, a diffusion barrier layer covering all the upper surface of the lightly doped polysilicon layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. The applicant has argued that Chang et al. and Chao are silent with respect to a high resistive thin film resistor structure comprising: a patterned, lightly doped polysilicon layer located on and in contact with the isolation region, a diffusion barrier layer covering all the upper surface of the lightly doped polysilicon layer. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art of record.
